Subject: RE: City of Anaheim presentation of transit vendors

Categories: Red Category

Here is some more information:

Kittelso has been conducting transit planning, operations and design projects across the county for the last 35 years. Locally, Kittelso staff have been involved with both the Central Harbor Boulevard Transit Corridor Study for OCTA and the previous version of the Anaheim Rapid Connection (ARC) project. In addition, Kittelso has been working on several projects directly for the City through their traffic engineering on-call and is currently engaged with the City as part of their Beach Boulevard Corridor Study with OCTA.
